

INSTRUCTIONS to SET UP BLOOD PRESSURE SCREENINGS

FCN/HMN encourages you to use these documents as an easy resource for setting up and managing Blood Pressure Screenings in your community. These documents were revised in January 2018 and contain the latest updates recommended by the American Heart Association and the American College of Cardiologist released November, 2017.

Please note all wording with blue lettering contains hyper-links to American Heart Association Guidelines and Resources. Simply hover over the blue word(ing) until the small hand appears, then click to activate the link.

These documents are both printable and meant to be used electronically to connect to resources contained within the hyper-links. If you have a smart phone, electronic note pad or computer you can review the links with your client during your BP screening. Feel free to email the BP half sheet to your clients in addition to printing hard copies. Be sure to review with them how the hyper-links work.
